11/8/78,
Harold: I assume you sent this original by mistake, so I am returning it, having retained a copy. There is really potential for a dynamite suit on pix/Xrays, but, as always, the question of whether such a suit would be the best use of limited resources. I am so busy right now that it is difficult for me to realistically plan on doing much in this line.

Best to you and Lil from Duane & I.

Harold
